

Acknowledgments

The book has its origins in the first international symposium of *Challenges of Fingerprinting in Indoor Positioning and Navigation* (<http://symposium.uoc.edu/4323.html>), which took place at Barcelona (Spain) on 2016, and sponsored by Universitat Oberta de Catalunya and the program Internationalization at Home from CaixaBank. In the event, the state of the art of fingerprinting indoor positioning and navigation and practical cases were discussed. Results of this discussion are summarized in the first chapter of the book, that constitutes a brief introduction to the chapters that appear in the entire book.

We would like to thank the authors of the chapters for their invaluable collaboration, generosity, and prompt responses to our enquiries. We also would like to acknowledge and thank the feedback, assistance, reminds, and encouragement received from the editorial staff of Elsevier, Gabriela Capille and Sonnini Yura as well as the book series editor Dr. Fatos Xhafa. We would like to thank Vijay Bharath for managing the production process of the book.

Finally, we would like to thank the REPNIN Spanish excellence network in indoor positioning and navigation, TEC2015-71426-REDT, and the Spanish Ministry of Economy and Competitiveness for the project TIN2015-70202-P.
